Dear Friends, Dear Commercial Partners,

Spacek Product commenced operations in 1991, manufacturing sintered disc brake pads for a wide range of both road and off-road motorcycle model applications, utilising „Goldfren“ as our chosen product brand logo. In the following 29 years since our commencement of manufacturing operations, we have today in 2020 become one of the largest aftermarket suppliers to world markets in this product sector (M/Cycle disc brake pads).

During this period of evolution and growth in our commercial operations; as a result of continuous heavy investment in R & D, we have successfully expanded our product range of sintered brake pads to incorporate aftermarket product to service the Aeronautical, Heavy-Duty Industrial Logistics Equipment (Lifting Cranes), Automotive Motorsport, Mountain Bike, and M/Cycle Motorsport Sidecar, commercial sales sectors.

To continue to endeavour to meet our customers evolving demands in the intensely competitive and critical commercial world we all operate in, Spacek Product continues to invest heavily in product R & D to maintain development of „new generation“ products, and to maintain our position at the technological forefront of the Sintered Friction Braking Industry. By basing our manufacturing facility in the Czech Republic which is world renowned for its engineering excellence since some 100 years past, we are able to offer our customers the perfect combination of world leading technology combined with a very competitive production cost base so that the customer and the consumer can purchase the best quality product at the most competitive price – with complete confidence in the performance, durability, and reliability of the product.

We commenced production in 2000 of a complete range of aftermarket Street and Motocross Disc Brake Rotors, applicable to most Japanese and European Sport and Touring M/Cycles, Scooters, ATV M/Cycles, and Motocross models. These Rotors are available in OEM round configuration, and in several other specialised aesthetic style configurations.

One of our current priorities in our manufacturing program is to introduce graphic design elements to differentiate and protect our Goldfren branded product range from plagiarism from inferior product brands attempting to (without our authority) capitalise on our heavy investment in R & D and product promotion. It is our absolute priority to protect and to add value to our Goldfren product reputation, to support and promote our customers marketing programs in their home markets throughout the world.

Dear friends, Dear commercial partners; we thank you for your current and past support, and we are sure that you continue to value our efforts to offer you the best possible product technology and pricing that your market demands, and we are confident that you will value our Goldfren product range as a „priority and preferred“ product group in your inventory and marketing strategies.

Yours Truly, Mr. Stanislav (Stan) Spacek

Managing Director / Spacek Product

FRONT AND REAR BRAKE CALIPER FOR OFF-ROAD

GOLDFren calipers are built 100% with CNC technology using the best duralumin quality commonly found in the aircraft industry.

GOLDFren front off-road caliper

To its advantages belong stiffness, 27 mm pistons and improved design of bleeding channel. It is designed as a replacement for stock brake calipers on Japanese motocross bikes. When used on other bikes an adapter must be mounted.

GOLDFren rear off-road caliper

can be used without an adapter on Kawasaki and Suzuki (250/450) bikes. On KTM, Husqvarna, Honda and Yamaha an adapter must be mounted. GOLDFren manufactures all these adapters. Piston diameter is 25,3 mm and weight is 450 g.

REAR FLOATING BRAKE DISCS FOR OFF ROAD

FRONT RADIAL BRAKE CALIPER

GOLDfren Radial four-piston brake caliper MONOBLOCK

For street race bikes. It is suitable for discs of 270-330 mm in diameter and 5-6 mm in thickness. The piston diameters are 36 mm and 32 mm, distance between screws that hold caliper on the fork is 108 mm, its weight is 800 g. This caliper is standardly made in gold and black color and it is supplied together with brake pads – type 301. This caliper can also be used in supermoto with an adapter.
