# COME ATTIVARE UNA BATTERIA MF CON TECNOLOGIA AGM

## HOW TO START A MF AGM BATTERY

**1** Togliere la lamina protettiva dalla batteria  
Remove the sealing sheet

Liberare il flacone dell' elettrolito dalla pellicola protettiva e rimuovere il coperchio che successivamente sarà utilizzato per richiudere la batteria  
Remove the protective film from the electrolyte bottle and remove the plastic lid which will be used in a second step to close the battery.

**2**

**3** Capovolgere il contenitore dell' elettrolito e posizionarlo con cura in modo che i beccucci del flacone siano orientati in corrispondenza dei fori di riempimento della batteria. A questo punto si può spingere con sufficiente forza da permettere la rottura dei sigilli in alluminio del flacone e consentire il riempimento della batteria  
Turn upside down the electrolyte bottle and carefully place it so that the spouts of the bottle perfectly coincide with the holes of the battery. Forcefully push now in order to break the aluminum seals of the bottle and allow the replenishment of the battery.

Lasciare che il flacone di elettrolito si svuoti completamente. Se questo processo dovesse risultare lento aiutare il liquido a fuoriuscire con dei leggeri colpetti di dita  
The electrolyte bottle has to be completely empty. Facilitate the process with light fingers flicks.

**4**

Utilizzare il coperchio di plastica visto nella figura 2 per chiudere i fori di riempimento della batteria. Utilizzare entrambe le mani e pigiare energicamente ed uniformemente sino a quando il bordo superiore del coperchio di plastica non sia al livello del bordo superiore del coperchio della batteria. Da questo momento non rimuovere in nessun caso il coperchio di plastica

**5** Use the plastic lid of picture no. 2 to close the holes of the battery. Use both your hands and strongly push everywhere until the superior side of the lid is perfectly on the same level of the battery lid. Since now do not remove the plastic lid for any reason.

# COME ATTIVARE UNA BATTERIA CONVENZIONALE

## HOW TO START A CONVENTIONAL BATTERY

**1** Utilizzando un giravite, svitare e rimuovere i tappi a vite sulla parte superiore della batteria  
Using a screwdriver, unscrew and remove screw caps from the top of the battery

Liberare il flacone dell' elettrolito dalla pellicola protettiva e tagliare con delle forbici la parte terminale in modo da creare un' apertura per consentire la fuoriuscita dell' elettrolito

Remove the protective film from the electrolyte bottle and cut, by scissors only, the upper part in order to open it and allow the electrolyte to come out

**2**

**3** Infilare l' apposita cannuccia sulla parte superiore del flacone  
Insert the supplied straw into the top of the bottle.

Rotare il flacone e posizionarlo con cura in modo che la cannuccia sia inserita in uno dei fori di riempimento della batteria. Lasciare defluire il liquido sino a quando non sarà raggiunto il livello indicato dalle apposite tacchette. Ripetere questa operazione per tutti i fori di riempimento della batteria

Turn the bottle and carefully place it so that the straw goes into one of the holes of the battery. Liquid will pour out until the level indicated by notches will be reached. Repeat the procedure for all the holes of the battery

**4**

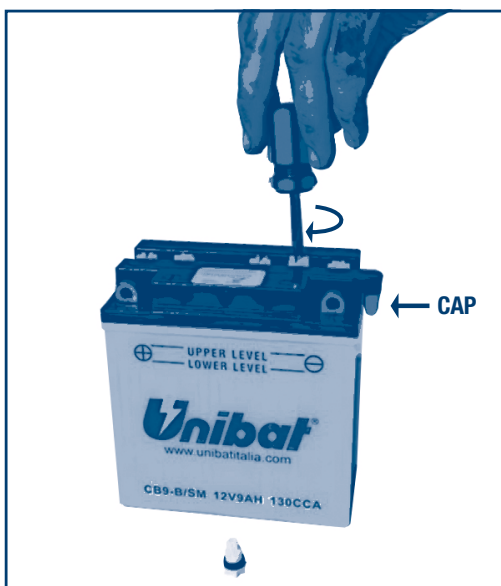

Terminata la fase di riempimento, sarà possibile richiudere i tappi a vite utilizzando nuovamente il giravite e serrandoli energicamente.

**ATTENZIONE** - prima di effettuare la carica della batteria assicurarsi di aver rimosso il tappino di protezione (CAP) indicato in figura

**5**

Once finished, close the screw caps using again a screwdriver.  
**ATTENTION** - before charging the battery, be sure to remove the protection cap (CAP) indicated on the picture.
